SUMMARY

Software Engineer with 5+ years of experience delivering production systems across backend and frontend. Specialized in backend development using NodeJS, TypeScript, Golang and PostgreSQL, with hands-on experience building APIs, integrating third-party services, and supporting high-volume transactional systems. Comfortable working end-to-end, from system design to deployment in cloud environments.

EXPERIENCE

Senior Software Engineer at Sicepat Ekspres Indonesia

2022 - Current

- Developed an event-driven Pickup Request Service using NodeJS, TypeScript, PostgreSQL, and Kafka, handling hundreds of thousands to millions of requests on campaign days while maintaining data consistency across services.
- Optimized backend systems for core logistics workflows by tuning PostgreSQL queries and indexes, reducing API response times by 30–50% on high-traffic endpoints.
- Led the migration of the Mobile Pickup backend from a legacy system to an in-house Golang service, improving reliability of daily pickup processing during peak operations.
- Implemented asynchronous processing and message-based synchronization with Kafka, significantly improving system stability under high load and reducing request failures during traffic spikes.

Full Stack Engineer at Hubbed

2022 - 2022

- Built an e-commerce and inventory management system integrating Shopee and Lazada APIs, enabling automated order ingestion and inventory synchronization across platforms.
- Implemented near real-time stock and order syncing, reducing manual reconciliation and preventing overselling across multiple sales channels.
- Developed backend services and frontend interfaces to support order processing, inventory tracking, and admin workflows, ensuring stable daily operations for active merchants.

Backend Developer at Valhalla Technologies

2020 - 2021

- Led backend development for multiple mobile applications from concept to production, designing RESTful APIs, authentication flows, and data models.
- Built backend services for a voice-based social app (Tannoi) with cloud storage and social login (Google, Facebook, Apple), supporting media uploads and user-generated content.
- Developed backend systems for an iOS content-sharing app (Fourz), implementing deep linking and email notification workflows to support user engagement.
- Contributed to a community-based Android app (Wrga) by implementing event management, business listings, and real-time chat integration using third-party services.

SKILLS

Backend & Databases

Node.js, Express.js, TypeScript, Golang, NestJS, PostgreSQL, MongoDB, Kafka

Frontend

ReactJS, NextJS, HTML, CSS, PHP

Cloud & Infrastructure

AWS, Google Cloud Platform, DigitalOcean

EDUCATION

Hacktiv8 Indonesia

Fullstack Javascript Developer

Lampung University

Computer Science
